

# Secure eChattel with SmartTRANSFER

Whether you need to electronically store records for all contractual obligations, loans, leases, insurance attestations, and more, SmartTRANSFER using DocMagic's award-winning SmartSAFE® eVault is the ideal solution. You'll have compliant control of your records, which you can use to streamline collateralization efforts and provide securitized pools for the transfer of assets between parties. All while ensuring secure access to authoritative copies and linked ancillary documents.

Let us help you with all your electronic records and eChattel business needs!

#### Be efficient

Improve your capital workflow through real-time bulk management of security interests.

#### Choose your format

Have storage and support for all data types and formats including both electronically and wet-signed documents.

#### Go paperless

Cut your operational costs by storing and managing documents electronically.

#### Maintain integrity

Retain a tamper evident seal to ensure data and document integrity.

#### Increase transparency

Enhance trackability with a comprehensive audit log and offer more flexibility in managing portfolios.

#### Grab control

Access, manage, and transfer records in real-time and store them on a short or long-term basis.

#### Validate electronic records

Automatically validate the integrity of transferable electronic records.

#### Allow secure access

Provide instant and easy delivery to investors, services, and sub-servicers.
